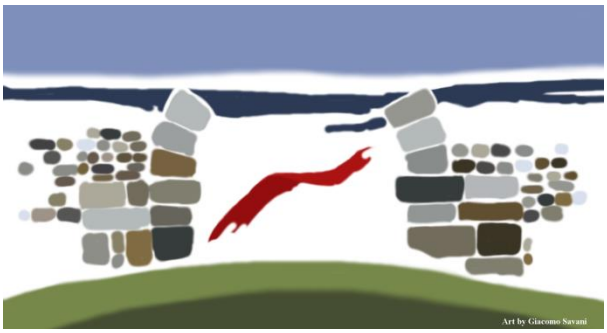
Roman Society

Workshop

Sensory Experience in Rome's Northern Provinces



Saturday 6 October, 2018, 10am – 6pm
Woburn Suite (Room G22/26), Senate House, University of London

Confirmed keynote speakers: **Patty Baker (University of Kent)**
Andrew Gardner (University College London)

The senses were functionally significant to all aspects of Roman life and played a central role in private and public events, from religious ceremonies to gladiatorial fights. While the sense of sight has dominated archaeological practice and theory for decades, scholars are now starting to address the ancient sensorium as a whole. This workshop will focus on the sensory implications of archaeological material from the Roman North (including modern France, western Germany, Belgium, the Netherlands, and Britain), from their earliest interactions with Roman civilisation to Late Antiquity. National and international scholars will discuss the sensory impact that the influx of external material culture, behaviours, urbanism, and populations had on indigenous communities in the northern provinces, presenting their material in a sensorially engaging and un-traditional way. The full programme will be available in July.

Queries to the organisers: Thomas Derrick and Giacomo Savani - sensoryexpRNP@gmail.com

Tickets for the event, including morning and afternoon refreshments, and a hot buffet lunch, cost £14 (Roman Society members / Students / Unwaged); £17 (full price). Bookings are being taken now, and will be acknowledged by email. Please return your form to the Roman Society, Senate House, Malet Street, London WC1E 7HU.
